

OFGO STUDIO

BEATBOX

FEATURES

- Collaborative units can be used together to create a wide variety of layouts.
- Versatile components can reconfigure easily to accommodate changing activities and user customization.
- Beatbox screens attach onto the back and sides of a seating unit to transform an open seat into a private enclosure.
- Units are standard with 3" x 1" powder coated rectangular profile legs. Legs have the option to be anchored to the floor.
- Seating frames are heavy duty with interlocking construction. Joints reinforce each other for maximum stability.
- Seats are high resiliency 1.8 lb. per cubic ft. density CFC-free polyurethane foam. Fire retardant foam meets CAL 117 requirements. All cushions are fixed and non-removable.
- All lounge seating units can be specified with power/USB modules, which include 2 power outlets, and 1 double USB terminal.
- Each power/USB module can be set on the Front, Left or Right side of the lounge unit. Cables can route underneath to direct wiring out to a floor monument.
- Models can meet the requirements of CAL133 when upholstered using appropriate materials. Textiles material must be pre-approved for CAL133 application.
- Manufactured with environmentally friendly preferred products (EPP).
- Greenguard Indoor Air Quality Certified®.
