

INDEX

Statement of Line

From sitting to standing at a touch of a button.

INDEX height adjustable tables address the need to move and allow users to change position frequently throughout the day with ease. With 4 programmable memory presets controlling quiet telescoping legs, INDEX is equipped to handle agile spaces.

INDEX bases have built-in sensors in their control boxes which can detect angle and speed changes, triggering the anti-collision safety feature. Furnish your INDEX base with add-ons such as a privacy screen, wire management tray, or cable sleeve for an elegantly beautiful space.

- Equipment payloads up to 250 pounds with dual motor lifting functionality
- 4 memory presets with one touch adjustability
- No hole columns offer a clean design
- Features anti-collision technology through built-in sensors
