

OFFICE ATRIUM

Products Featured: UNIFY; PULL UP; VIBE; VITA; STAX

Location: Ontario, Canada | **Dealer Partner:** NICHE For Design Inc.

THE OBJECTIVE

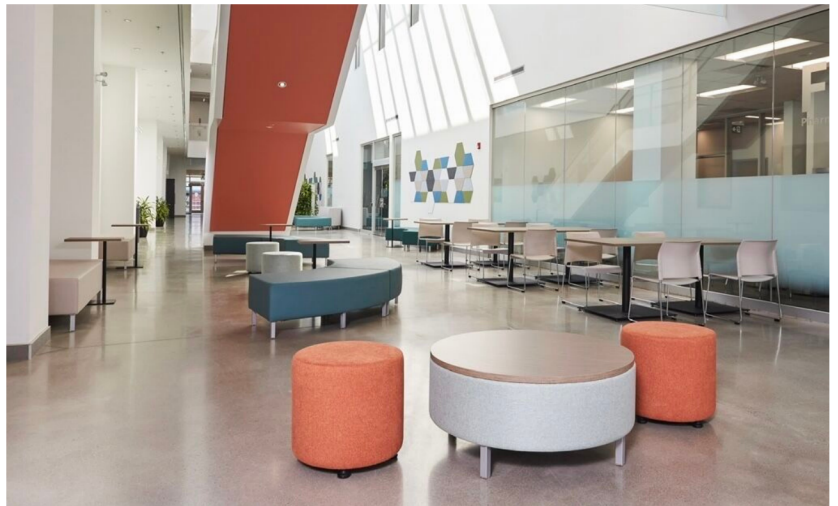

This flexible atrium environment serves as an amenity space for the biomedical industry tenants in the building. The space was previously underutilized as it lacked function without furniture and defined spaces. The objective included designing a space that would function for multiple uses as well as addressing acoustical challenges caused by the large open space and hard surfaces.

THE SOLUTION

After reviewing the customer needs, OFGO STUDIO dealer partner NICHE for Design Inc. proposed a blended solution using several OFGO STUDIO product lines. These included UNIFY, VIBE, PULL UP, VITA AND STAX.

The layout and furniture is design to create zones, accommodating lunch and breakout space with VITA tables and STAX

chairs in addition to casual social zones with soft seating from UNIFY and VIBE. Pops of colour defined these zones while also energizing the space. By utilizing the high back version of UNIFY (47"H) with high arms, we were able to create visual and acoustical privacy while also providing a restorative opportunities. The introduction of moveable PULL UP tables further emphasizes function as it allows users to eat and work from multiple zones.

THE RESULT

The installations of the new items in this space went extremely well and the building tenants are thrilled with the quality of the furniture. The space is utilized much more and the customer will certainly be specifying OFGO STUDIO again in the future!
