

# CASE STUDY

## CANAM ENGINEERING

**Products Featured:** MODERN, INDEX, UNIFY

**Location:** Toronto, ON | **Dealer Partner:** Sensyst, The Business Interiors Group

### THE OBJECTIVE

Canam Engineering, an industry-leading steel sector Engineering Firm, reimagined their offices, encompassing over 14,500 square feet of space in Mississauga, ON. This project was not only a renovation; it was a complete reinvention of the Firm's workspace, tailored to reflect their unique business identity. The objective was to design a space that incorporated unique design elements including collaborative areas, private offices, quiet spaces and corporate identity.

## THE SOLUTION

OFGO STUDIO dealer partner Sensyst, The Business Interiors Group took a consultative approach with Canam and outlined several specific features and benefits they were looking for in the furniture and space. This included: design aesthetic, quality and durability, functionality, customization capability, environmental and sustainability factors and value.

MODERN storage combined with INDEX height adjustable tables were used in all private offices, providing a quality, functional and economical solution. Collaboration and quiet areas were outfitted with UNIFY soft seating to provide an interactive, design-forward space. By integrating Canam's brand colors throughout the space, pops of color were provided to enhance the corporate identity.

The warm tones in Linea Mocha with True White accents were selected for the laminate finishes to enhance aesthetics and comfort within the environment. Linea Mocha and True White are both ECO+™ laminates which utilize 100% recycled wood fibre within the laminate core. This fit perfectly with Canam's environmental and sustainability focus.

## THE RESULT

Canam Engineering's new space provides a new space for employees that matches their goals and corporate identity. The new space is bright, airy and is perfectly tailored to their needs as an organization. OFGO STUDIO products were delivered on time, with no punch items. The completion of the space marked a significant milestone in Sensys's journey of creating spaces that resonate with a company's values and operational needs.
