

## PROFESSIONAL CONSTRUCTION SERVICE

**Products Featured:** SAVOY, MYZONE, INTRODUCE, MODERN

**Location:** Phoenix, AZ | **Dealer Partner:** Commercial Furniture Co.

### THE OBJECTIVE

A professional construction company based in Phoenix, Arizona, needed to upgrade its entire office to create a high-quality workspace tailored to its employees. However, they faced the challenge of sourcing furniture to fit within their budget, including height-adjustable tables for every employee. They required a reliable partner to meet their needs and help elevate their employee areas, with a focus on raw materials.

# THE SOLUTION

Commercial Furniture Co., a trusted dealer partner of OFGO STUDIO, listened to the client's concerns and developed a solution to improve the employee experience. With dependable lead times, modern design, and competitive pricing, OFGO STUDIO stood out as the best fit for this job.

The reception area features INTRODUCE, a premium choice that creates a luxurious and welcoming environment for guests upon entry. Its waterfall transaction counter adds a dynamic contrast to the design, making a strong first impression.

Moving to the first floor, SAVOY, a height adjustable desking solution, was used in the private offices. Its layered shroud elevates the aesthetic, and floating shelves, pedestal and bookcases act as effective storage solutions with a minimalistic appearance.

On the second floor, combined MYZONE + SAVOY desking units were used to provide employees with suitable workspaces for both teamwork and individual tasks. These units maximize functional connectivity, storage, and height adjustability — all in one. Lastly, MODERN was selected for the boardroom, offering a collaborative solution designed for comfort during meetings. MODERN buffet cabinets were also used, providing a surface for placing items and convenient storage for presentation materials, ensuring easy organization.

Ginger Root was the laminate of choice due to its warm, natural tone and premium textured finish, which perfectly met the client's expectations. This finish enhances the space, creating a calming and inviting atmosphere. Reinforced with INVISA edge, OFGO STUDIO ensures its products are durable enough to withstand long-term use, resisting heat, moisture, and tampering.

## THE RESULT

Thanks to the collaboration with Commercial Furniture Co. and OFGO STUDIO, the construction company now enjoys a space that its employees absolutely love. The products matched the desired raw material aesthetic, and the company owner was thrilled with the final installation, which exceeded expectations. The installation was quick and easy, with no issues, as the products were installed ahead of schedule thanks to proper tagging and packing. This workspace will be enjoyed for a long time.
