

## BLUEPRINT CHURCH

**Products Featured:** MY ZONE, CROSBY, UNIFY, STAX, CTX, VIBE, SAVOY, KOLBY, TRELLO, WORKWAY Planters

**Location:** Houston, TX | **Dealer Partner:** Office Furniture Innovations

### THE OBJECTIVE

Blueprint Church, located in Houston, Texas, aimed to transform its facility into a welcoming environment that reflected the energy of its vibrant community. The church wanted a space that could seamlessly transition between services, community activities, and small group meetings, while making the most of its existing floor plan. They also needed to create a warm, inviting atmosphere that encourages conversation and fellowship among members.

To bring this vision to life, Office Furniture Innovations, a trusted dealer partner of OFGO STUDIO, provided tailored support throughout the process. Their integrated approach helped Blueprint Church select a diverse range of furniture solutions that balanced comfort, functionality, and budget while aligning with their design goals.

# THE SOLUTION

OFGO STUDIO was the right fit for this project with competitive pricing, a reliable warranty, fast service, and a modern aesthetic. A variety of products were installed throughout Blueprint Church, including a mix of workstations, tables, and seating. These diverse spaces ranged from collaborative communal areas to focused private offices and boardrooms.

MY ZONE, a flexible desking solution, was selected to create a multipurpose environment that supports staff, volunteers, and community members. It is beautifully crafted to promote flexibility with work and communal activities. Integrated power modules keep members connected and support collaboration throughout the day.

A variety of soft seating has been installed throughout the communal area, providing a comfortable space for members to gather and interact. The CROSBY collection's curved design invites people to settle comfortably, supporting relaxation.

Meanwhile, the UNIFY collection offers flexible seating that is ideal for gatherings and fosters a collaborative environment. WORKWAY Planters were strategically placed to create natural divisions and introduce biophilic elements that enhance and soften the space without the need to construct walls. To further improve functionality of the communal area, CTX tables and VIBE ottomans complement the lounge seating.

In the main seating and worship area, STAX, a lightweight multipurpose chair, was selected to accommodate the church's need for a flexible gathering space. It can be quickly arranged or stored to adapt to various events and services. Its sleek design aligns with the modern aesthetic of the space while providing comfortable support for attendees. With stacking capability up to 35 high, the entire space can easily be transformed by conveniently storing the chairs away when seating is not required.

In the private office, the workspace needed to accommodate individual and private interactions. SAVOY was selected as the executive desk, providing a welcoming environment for focused meetings. With its enclosed leg height-adjustable design, users can customize their working position, promoting comfort and healthy habits throughout the day.

CROSBY was selected for guest seating in the office, bringing a sense of cohesiveness from the communal area outside. Built with OFGO STUDIO's JIGSAW construction for durability, CROSBY ensures long-lasting performance while maintaining a contemporary aesthetic.

The boardroom needed to accommodate meetings, events, and community programs with ease. TRELLO tables were selected due to their flip-top and mobile bases, which allow for reconfigurable layouts. Its easy one-handed mechanism and durable surfaces with INVISA edgebanding make them suitable for both everyday use and special gatherings. KOLBY task chairs enhance the boardroom by providing ergonomic comfort during meetings. With multiple adjustment points, a breathable mesh back, and a contoured foam seat, KOLBY chairs promote healthy posture.

## THE RESULT

The project was a complete success, and the client was extremely happy with the result. Blue Print Church was able to transform its space into a welcoming environment that reflects the energy and warmth of its community. After initially looking at used furniture, the Church was extremely pleased with the end result of all-new furniture. Not only did OFGO STUDIO and Office Furniture Innovations meet their budget, but they were able to design the space using finishes and textiles that further enhanced the beauty of the environment. Usage of the space increased exponentially after install, and the thoughtful selection of products allowed the church to maximize its floor space while maintaining flexibility for a variety of gatherings, work, and prayers.
