

INSURANCE COMPANY

Products Featured: INTRODUCE, MODERN, PANELX, WORKWAY Planters, SAVOY, KOLBY

Location: Omaha, NE | **Dealer Partner:** JH Interior Design

THE OBJECTIVE

An insurance company located in Omaha, Nebraska, needed a new workspace layout that was bright, modern, and aligned with its corporate branding. The redesign needed to balance a modern, open-concept layout with employees' need for privacy and personal space due to the nature of their work. JH Interior Design wanted to help the company achieve its goal of creating distinct, highly functional workstations while maintaining an airy and welcoming environment. Additionally, integrating natural, calming elements was a high priority to foster employee well-being and productivity.

THE SOLUTION

JH Design partnered with OFGO STUDIO, a trusted manufacturer of high-performance workplace furniture. Guided by its “Premium For All” mission, OFGO STUDIO delivers premium built and attainable furniture solutions that combine thoughtful design, functionality, and lasting value.

First impressions are key and INTRODUCE was selected for the reception desk. As the primary point of contact to deliver a welcoming and professional experience for visitors, clients, and employees, this collection facilitates visitor reception and appointment management while providing a functional workspace for reception staff. Customer branding was included through a custom color transaction counter, provided by others.

In the main office, MODERN & PANELX was used to create workstations. MODERN storage was used to provide a sleek vertical personal storage cabinet for larger items such as jackets and bags, and a matching pedestal for professional files and smaller items. To keep primary work surfaces clear and organized, a pencil drawer was added to each desk for small-item storage. PANELX fabric screens were added throughout the workspace to enhance acoustic, visual privacy and provide distinct workstation boundaries.

The private offices were designed to mirror the elevated aesthetic of the main space while maximizing personal space. In these offices, MODERN desking and storage is paired with SAVOY floating shelves to provide management with additional space for organizational tools and personal items.

To complement each workspace, the KOLBY task chair was selected for its ergonomic design. Equipped with ergonomic features including adjustable lumbar supports, 3-way adjustable arms, and adjustable depth seat sliders, KOLBY was perfect to support one of the project's goals of fostering employee well-being and productivity. WORKWAY Planters were used to soften and introduce a biophilic element to the space. These dedicated planters bring natural color and warmth into the palette, introducing greenery to promote a healthier, more vibrant working environment.

Ginger Root and Willow Grey laminates were used throughout the space, providing a natural, textured appearance that supports the bright and natural theme. The warm wood tone softens the workplace environment and contributes to a more welcoming and comfortable atmosphere for employees and visitors.

THE RESULT

OFGO STUDIO and JH Interior Design worked closely to create a workspace tailored to the company's needs, delivering high-quality solutions. OFGO STUDIO's technical coordination and customer service were instrumental during installation, particularly in planning workstation layouts and floor core drilling for power distribution, ensuring seamless integration of technology and furniture. Through customized private offices and optimized workstation storage, the team maximized functionality while ensuring every element was appropriately scaled to the space.
